

Training Dollars for HCHMA

In order to bring more value to the Hotel – Motel Industry Sector during the time of this economic decline I have secured limited funds to allocate to HCHMA members.

The funds are for the purpose of training existing staff to help fortify their position with their business and provide training that will assist in elevating the value of the employee(s) with new or improved skills development according to the needs of the business. The training institution can be within your business or chosen by the employer. We (TBWA) can provide you with a list of training institutions, which you may utilize if you are in need of training assistance.

Time is very important in order to obtain these limited funds. A check list along with paperwork has been attached to be completed including what information is needed from the employer; we are taking the applications in the order which they are submitted until all funds have been allocated. If you have any questions or concerns please contact me at montgomeryc@workforcetampa.com or 813-930-7406.

I look forward to working with you.

Regards,

Calvin Montgomery
